

RIG WASH **Heavy Duty Rig Cleaner**

RIG WASH is especially designed synthetic detergent/ degreaser for general purpose use around oilfield machinery, oil production platforms, and drilling equipment. It is biodegradable and works with salt or fresh water. For extra cleaning power, diesel fuel can be mixed with **RIG WASH**. It is also a very effective oil dispersant.

RIG WASH is power activated to provide instant soil penetration. **RIG WASH** is safe, non-toxic and non-flammable when used according to label instructions. OSHA MSD sheets are available.

FEATURES

- *Safe on steel surfaces
- *Will not damage most painted surfaces
- *Works with fresh or salt water
- *Mixes with diesel fuel
- *Contains corrosion inhibitors
- *Safe when used as directed
- *Has effective oil dispersing characteristics

APPLICATION PROCEDURE

DIRECTIONS

FOR SPRAY APPLICATION: Use RIG WASH diluted with up to 30 parts water. For heavily soiled areas, completely wet area and allow to stand. Then rinse thoroughly with maximum pressure to remove soil.

FOR HAND APPLICATION: Use RIG WASH diluted with 10 parts water. Extremely heavy build up of soil may require a stronger concentration for more effective results. Removal of heavy soil may be hastened by brushing the area. For effective results, rinse area thoroughly.
